BLIND CONCEALMENT

Blindspace for Umbra.

For built-in blinds that completely disappear when not in use and magically appear when needed.

OVERVIEW

- A range of profiles to conceal any size of blind
- Suitable for windows, doors and rooflights
- Standard and custom sizes available
- Can be powder coated to your required RAL colour

SYSTEM DETAILS

Blindspace is a purpose-designed aluminium profile for blind concealment. With a range of standard configurations to choose from, plus custom-made options to order, you can be sure to find a solution to your requirements.

Powder coated in matt white as standard, Blindspace profiles can also be overpainted or powder coated in any RAL colour.

The unique cover design clips securely in place but provides easy access to install, remove or maintain your blinds.

USES & APPLICATIONS

There is something fascinating and a touch luxurious about blinds which appear out of 'nowhere' and disappear again when not needed. But it is also extremely practical to recess blinds into walls, floors and ceilings.

Blindspace creates a clean and sleek aesthetic. Uncluttered windows maximise incoming daylight and the view out. Recessing blinds also removes potential obstructions for inward-opening doors and windows, and protects fabric from dirt and damage.

Blindspace can be used with manually operated blinds but is ideally suited for motorised and automated blinds and curtains.

A photograph showing a close-up of a light-colored, textured blind cover installed in a wooden frame. The cover is partially rolled up, revealing the slats of the blind underneath. The background shows a view of a river and hills through the window.
